Summary

With 2 years as a Front-End developer for a B2B firm, I am adept in React, JavaScript, TypeScript, HTML5, and CSS3. I've successfully completed 12 full-stack and front-end projects, including those utilizing the MERN stack, and have hands-on expertise in developing extensive web applications. My grounding in UX/UI design ensures clean and high-quality code for UI elements. A John Bryce-trained Full Stack Developer, I've been recognized with an army excellence award. I bring sharp analytical skills, problem-solving acumen, and a collaborative team spirit.

Technologies

JavaScript, Typescript, React, Node

Experience

2023 - present [Stealth](#) - Front-End Developer (Part Time)

building infrastructure for a newborn startup using React, Typescript and Redux.
refactoring old code, developing key features and maintaining current code.
working with AWS as backend.

2021 - 2023 [Dcentralab](#) - Front-End Developer (Full Time)

Experienced in frontend architecture, specializing in building and integrating large-scale web applications. Proficient in tools like Figma, JavaScript, TypeScript, React, and Redux, I excel at crafting responsive applications and refining code in production environments. My strength lies in delivering high-quality UI components, adhering to UI/UX principles, managing tight deadlines, and maintaining efficient user communication. I am also well-versed with Git.

Education

2020 - 2021 Full Stack Developer, GPA 100, John Bryce

Java, Spring Boot, Restful API, React.ts + Redux, Typescript, Javascript, MySQL \ MariaDB \ Postgresql, Microservices, Docker

2022 - 2023 Blockchain expert, GPA 100, Crypto Jungle

Blockchain technology and market analysis

Projects

2023 Chat App Project - Recat.Ts, Node.Ts, Socket.io

Chat app that utilizes socket.io

Developed with: React.Ts, Node.TS, Socket.io

Link: <https://github.com/DadonStyle/ChatApp>

2022 - 2023 React-style-component-helper Project - React, JavaScript

Live extension that will rapid react style component development time

Developed with: React, JavaScript

Visual Studio code extension: [https://marketplace.visualstudio.com/items?](https://marketplace.visualstudio.com/items?itemName=NoamDadon.react-style-component-helper)

[itemName=NoamDadon.react-style-component-helper](https://marketplace.visualstudio.com/items?itemName=NoamDadon.react-style-component-helper)

Link: <https://github.com/DadonStyle/react-style-component-helper>

2022 - 2023 Crypto Tower FE Project - Recat.js

Crypto Game that I developed with friends for fun

Developed with: React.js

Link: <https://github.com/DadonStyle/login-auth>

2021 TransferERC20 Project - Recat.js, Web3

Using Web3 to connect to the blockchain, transfer token components

Developed with: React.js, Web3

Link: <https://github.com/DadonStyle/TransferERC20>

2021 ShorterURL Project - Recat.Ts, Node.Ts

Count the clicks per unique URL

Developed with: React.Ts, Node.Ts

Link: <https://github.com/DadonStyle/Url-Shortener>

Military Service

2015 - 2018 Stuff Coordinator, IDF

Full army service

Access to sensitive information (High-security clearance)

Managing and assisting over 200 officers per year

Managed another soldier

Received an excellence award for my work

Languages

Hebrew – Native Speaker.

English – High Proficiency.
